Help Build The Village School: Founding Board Members

The Village School is taking shape, and I'm inviting community members to join the founding board of this proposed public charter school.

Our educational model brings together three defining commitments: **language acquisition through daily Spanish instruction, learning through the MicroSociety model, and plans to apply for International Baccalaureate (IB) authorization.** Together, these elements are intended to help students become curious, capable learners and global citizens prepared to contribute to their communities.

Founding board members will help guide the school's development, provide strong governance, support long-term sustainability, and keep the needs of students and families at the center of our work. I'm especially interested in connecting with people who bring experience in education, finance, law, governance, community engagement, fundraising, or organizational leadership.

If you're interested in learning more, or know someone who may be a good fit, I'd love to connect. Visit www.thevillageschoolga.org, to learn about The Village School, express your interest, and sign up for our newsletter to receive updates about the school's development and next steps.

The Village School is in the planning and authorization process. Opening is subject to approval and completion of the required steps.

Rooted in Community. Ready for the World.

Welcome to our village.
